OVERVIEW **EX**

Maudrex Group is a dynamic and innovative civil engineering company dedicated to providing exceptional construction and design solutions. With a focus on civil, structural and material supply, we offer a comprehensive range of services aimed at meeting the diverse needs of our clients

At Maudrex, we understand that a successful project begins with comprehensive planning and accurate cost estimation. That is why we have developed a robust system that allows us to create proper cost estimates, enabling our clients to have a clear understanding of the financial aspect of their projects. We leave no room for surprises or hidden cost, ensuring that our clients know exactly what it will cost them and how long it will take.

In a world where cost overruns and unexpected delays are all too common, Maudrex contracting stands out as a trusted partner that brings clarity and certainty to the table. We firmly believe that when clients are equipped with accurate cost estimation and a well thought-out plan, they make informed decisions, gain peace of mind and achieve their desired outcome which is a home or infrastructure

CORPORATE IDENTITY EX

VISION

To become the foremost African leader in Structural and civil engineering contracting, as well as in supplying construction materials and offering Interior design services, while consistently meeting the expectations of all stakeholders.

This vision will be achieved by:

1. Establishing a conducive atmosphere to draw in, keep, and nurture top-tier employees.
2. Timely provision of superior products and services to customers.
3. Being highly adaptable and adequately equipped.
4. Handling relationships with clients and other stakeholders in a professional and ethical manner.
5. Fulfilling social, health, safety, and environmental obligations.
6. Implementing the best practices of corporate governance

OUR CORE VALUES

Quality

The company prioritizes delivering high-quality workmanship and materials, ensuring that projects meet or exceed industry standards and client expectations.

Integrity

The company operates with honesty, transparency, and ethical practices, building trust with clients, employees, and stakeholders.

Professionalism

The company upholds a high standard of professionalism in all interactions, maintaining clear communication, timeliness, and a strong work ethic.

OUR DISCIPLINES **EX**

1. **Civil works**
 2. **Structural Engineering**
 3. **Bulk Earthworks**
 4. **Steel Fixing**
 5. **Shuttering**
 6. **Plant Hire**
 7. **Concrete Works**
 8. **Agriculture**
 9. **Mining**

STRUCTURAL ENGINEERING

. Maudrex Group takes great pride in providing exceptional structural engineering services. Our team of skilled and experienced structural engineers is dedicated to designing safe, efficient, and innovative structures for a wide range of construction projects. We offer a comprehensive range of structural engineering services to meet the unique needs of our clients.

Structural Design and Analysis:

Our structural engineers work closely with architects, contractors, and clients to develop structural designs that meet project requirements and regulations. Using state-of-the-art software and advanced analysis techniques, we create robust structural systems that can withstand various loads and environmental conditions. Our designs encompass a wide range of structures, including buildings, bridges, industrial facilities, and more.

Structural Inspections and Assessments:

We conduct thorough structural inspections and assessments to evaluate the condition and safety of existing structures. Our engineers perform visual inspections, non-destructive testing, and structural analysis to identify any deficiencies, deterioration, or po-

tential risks. Based on our findings, we provide recommendations for repairs, retrofitting, or strengthening measures to ensure the structural integrity of the building.

Foundation Design:

We specialize in designing reliable and cost-effective foundations for different types of structures. Our engineers consider soil conditions, load requirements, and local regulations to develop suitable foundation systems, including shallow foundations, deep foundations, and specialized foundation solutions. We ensure that the foundations provide the necessary support and stability for the structure above.

Construction Support and Site Monitoring:

During the construction phase, our structural engineers provide support and monitoring services to ensure that the construction aligns with the design intent. We conduct site visits, review construction plans, and perform structural inspections to verify compliance with the approved design. Our goal is to ensure that the structure is constructed safely, in accordance with the design documents.

CIVILS

Maudrex Group offers a wide range of civil engineering services to support various types of construction projects. Our team of highly skilled civil engineers has expertise in designing and managing the infrastructure that forms the foundation of our built environment. We provide comprehensive civil engineering solutions from project inception to completion.

Here are some of the key civil engineering services we offer:

Site Development and Grading:

We specialize in site development and grading, ensuring that the land is properly prepared for construction. Our civil engineers assess the topography, soil conditions, and drainage requirements of the site. We design grading plans that optimize site utilization, manage storm water runoff, and ensure proper accessibility and safety.

Road and Highway Design:

Our civil engineering team has extensive experience in road and highway design. We develop efficient and safe transportation networks, considering factors such as traffic flow, road geometry, pavement design, and signage. Our designs prioritize functionality, sustainability, and adherence to local regulations and standards.

Utility Infrastructure Design:

We design utility infrastructure systems including water supply networks, sewage systems, storm water management systems, and utility distribution networks. Our civil engineers consider factors such as capacity, durability, environmental impact, and regulatory compliance to develop reliable and sustainable utility infrastructure solutions.

Earthwork and Excavation:

We provide expertise in earthwork and excavation, ensuring proper soil stabilization, excavation, and earthmoving for construction projects. Our civil engineers utilize advanced techniques and equipment to optimize earthwork operations, balancing cut and fill volumes, managing soil erosion, and ensuring site stability.

Drainage and Flood Mitigation

Our civil engineers design effective drainage systems to manage storm water runoff and mitigate flood risks. We analyse hydro-

Our Capabilities

- General Civil
- Dam Construction
- Reservoirs
- Culvert and Drainage
- Industrial Civils
- Buildings
- Pump Stations
- Electrical and Substations
- Water Treatment
- Waste water Treatment
- Retaining Structures
- Precast Concrete Structures

lic characteristics, evaluate water flow patterns, and design drainage networks, culverts, and retention ponds to efficiently manage and control storm water.

Environmental Engineering

We integrate environmental considerations into our civil engineering services by implementing sustainable and environmentally friendly practices. We conduct environmental impact assessments, develop pollution prevention plans, and incorporate green infrastructure solutions to minimize the environmental footprint of our projects.

Construction Management and Supervision:

Our civil engineers provide construction management and supervision services to ensure the successful execution of projects. We oversee construction activities, coordinate with contractors and subcontractors, monitor project progress, and ensure compliance with design specifications, quality standards, and safety regulations.

PLANT HIRE

Maudrex Contracting is a reputable company that specializes in providing top-quality construction machinery hiring services. With a strong commitment to meeting the diverse needs of our clients, we offer a wide range of high-performance and reliable construction equipment for hire. Whether you require excavators, bulldozers, cranes, loaders, or other specialized machinery, Maudrex Contracting has you covered. Our state-of-the-art equipment is meticulously maintained and operated by skilled professionals, ensuring optimal performance and efficiency on your construction projects. With our flexible rental options and competitive rates, we strive to deliver exceptional value and complete customer satisfaction. Choose Maudrex Contracting for all your construction machinery hiring needs and experience the reliability and expertise that sets us apart in the industry.”

CONCRETE WORKS

Maudrex Contracting is a trusted name in the field of concrete works. We specialize in delivering high-quality concrete solutions for a wide range of projects, from residential and commercial buildings to infrastructure and industrial developments. Our experienced team of concrete experts is skilled in all aspects of concrete construction, including foundations, slabs, columns, walls, and more. We prioritize precision and durability in every project, using advanced techniques and top-grade materials to ensure long-lasting results. Whether it's a small-scale renovation or a large-scale construction project, Maudrex Contracting is equipped to handle your concrete needs with professionalism and expertise. Trust us to deliver superior craftsmanship, timely execution, and exceptional customer service for all your concrete works requirements

Our Capabilities

- Concrete Plinths
- Foundations
- Concrete Repairs
- Rigid Pavements
- Retaining walls
- Walk Ways

BULK EARTH WORKS

Maudrex Contracting's earthworks division, Bulk earth works, provides a comprehensive suite of civil construction services including clearing, earthworks, township and mining infrastructure, road work, slurry seals, dam construction, landfill construction, and chip/spray surfacing. They are a versatile contractor capable of tackling a wide range of large-scale land development and infrastructure projects

Our Capabilities

- Clearing
- Earthworks
- Township Infrastructure
- Mining Infrastructure
- Road Construction and Rehabilitation
- Slurry Seals
- Dam Construction
- Land Fill construction
- Chip and spray surfacing

AGRICULTURE

Our Capabilities

- Clearing
- Land Preparation
- Land Levelling
- Drainage
- Minor and Major concrete Structures
- Agricultural Infrastructure
- Road Construction and Maintenance

SHUTTERING

Maudrex Contracting also provides shuttering services as part of their comprehensive construction offerings. Shuttering, also known as formwork, is a crucial component in the construction process that involves creating temporary structures to support concrete during pouring and curing. Maudrex's shuttering services encompass the design, fabrication, installation, and removal of formwork systems tailored to specific project requirements. Their experienced team ensures precise and sturdy formwork construction, enabling the creation of complex concrete structures with excellent dimensional accuracy. By offering professional shuttering services, Maudrex ensures the efficient and safe execution of concrete works, contributing to the overall success and quality of construction projects.

STEEL FIXING

Maudrex Contracting specializes in steel fixing services, an integral part of construction projects that involves the installation, positioning, and securing of steel reinforcement bars or mesh within concrete structures. With their expertise in steel fixing, Maudrex ensures the proper reinforcement of concrete elements, enhancing structural strength, durability, and safety. Their skilled team is well-versed in reading engineering drawings and specifications, accurately placing and tying steel bars according to design requirements and industry standards. Maudrex's steel fixing services cover a wide range of applications, including foundations, columns, beams, slabs, and walls. By providing efficient and precise steel fixing solutions, Maudrex contributes to the overall structural integrity and longevity of construction projects.

REFERENCE PROJECTS

Title: Kamativi Processing Plant

Project: Concrete Works

Client: Sino Hydro

SPECIFIC WORK ELEMENTS

Setting out of all foundation works ie Pad footings, Excavation & Compaction of the foundation, Concrete Blinding and curing, Re-bar bending and fixing, Form-work fixing and shoring, Slump test and concrete pouring, Curing and form-work removal, Asphalt Coating for underground protection and finally Backfilling and compacting

Title: Bulawayo Insukamini and Marvel ZETDC Substations Road repair works

Project: Road Repair works

Client: ZETDC and ZPC

SPECIFIC WORK ELEMENTS

Under the Zimbabwe Hwange Power Plant (2X335 MW) Expansion Project, Maudrex was sub-contracted by SinoHydro for some road repair works as part of the contract compliance. The specific works included marking out of the damaged areas, excavate to a depth where the road base has adequate strength the minimum elevation being 150mm. After that soil tests were conducted and fill material of ETB (Emulsion Treated Base) was used then a slurry seal on top
